对于Linux&Mac用户，请自行用G++编译(g++不再赘述)

1.点击release

2.点击fastans.zip，并下载到一个地方，解压

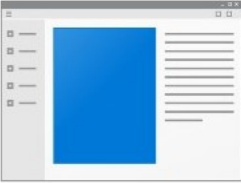

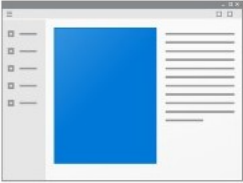

3.按start.bat，不要更改左面3个程序名

4.输入题目数，卷子上有多少个连续的选择题就输到多少

5.输入选择题起始头，比如整页第三个为单选，就输3，回车输入选项，注意大写，判断题A对B错

6.从vardata一直到请上面的花括号，一定全部复制，用鼠标点第一个字母向下滑动，按下右键复制，如果不会附加文件有链接，复制到浏览器看那里详细教程这里就不在赘述了

```
var data = {
    1: {
        'question': 1,
        'selections': '1'
    },
length: 1
}
for (var i = 1; i <= data.length+0; i++) {
        console.log(data[i])
        let ele = document.getElementById('divquestion' + data[i]['question']).children[1]
        data[i]['selections'].split('').map((x) => {
        ele.children[x.charCodeAt(0) - 65].children[0].click()
})
}
请按任意键继续. . .
